The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Safeguards on Nuclear Material, Implementation of US/IAEA Agreement.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a *Federal Register* notice with a 60-day comment period on this information collection on March 15, 2022 (87 FR 14585).

1. *The title of the information collection:* Part 75 of title 10 of the *Code of Federal Regulations* (10 CFR), “Safeguards on Nuclear Material, Implementation of US/IAEA Agreement.”

2. *OMB approval number:* 3150-0055.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Selected licensees are

required to provide reports of nuclear material inventory and flow for selected facilities under the US/IAEA Safeguards Agreement, permit inspections by International Atomic Energy Agency Agreement (IAEA) inspectors, complementary access of IAEA inspectors under the Additional Protocol, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. Reporting is done when specified events occur. Recordkeeping for nuclear material accounting and control information is done in accordance with specific instructions.

6. *Who will be required or asked to respond:* Licensees required to report information required by the U.S. Additional Protocol. Licensed possessors of nuclear material outside facilities in the U.S. Caribbean Territories.

7. *The estimated number of annual responses:* 22 (12 reporting responses + 10 recordkeepers).

8. *The estimated number of annual respondents:* 10.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 3,234.

10. *Abstract:* 10 CFR part 75, requires selected licensees to provide reports of nuclear material inventory and flow for selected facilities under the US/IAEA Safeguards Agreement, permit inspections by IAEA inspectors, complementary access of IAEA inspectors under the Additional Protocol, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. In addition, this collection is being renewed to include approximately 6 entities subject to the U.S.–IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366). These licensees will provide reports of nuclear material inventory and flow for entities under the U.S.–IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366), permit inspections by IAEA inspectors, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified

amounts of nuclear material. These licensees will also follow written material accounting and control procedures, although actual reporting of transfer and material balance records to the IAEA will be done through the U.S. State system (Nuclear Materials Management and Safeguards System, collected under OMB clearance numbers 3150–0003, 3150–0004, 3150–0057, and 3150–0058). The NRC needs this information to implement its responsibilities under the US/IAEA agreement.

Dated: July 26, 2022.

For the Nuclear Regulatory Commission.

Kristen E. Benney,
Acting NRC Clearance Officer,
Office of the Chief Information Officer.
